

INSTRUCTION

Step 1

Ensure LDU is standing at the correct orientation.

Step 2

Put on rubber shoes at the bottom of each of the 4 LDUs.

Step 3

Install the long DRB on LDU.

Step 4

After installing DRB at LDUs at all four sides, the basic structure of the rectangular shelf will be formed.

Step 5

Ensure LDU is standing at the correct orientation.

Step 5.1

Then align and install the LDU with connector to the LDU at the lower side.

Step 6

Install all the DRBs, and the basic structure of the entire shelf is formed.

Step 7

Insert rubber stopper into every hole between LDU and DRB to avoid coming off.

Step 8

Place shelf plate at every layer of DRB. The entire shelf is completed.

Step 9

Under the event of not using connectors, the user has below choices:
